

PRESS RELEASE – FOR IMMEDIATE RELEASE

Date: 21 May 2024

HULTEC ANNOUNCES MAIN SPONSORSHIP OF PPXXII CONFERENCE

Hultec, an industry leader in pipe sealing technology, with comprehensive production and distribution capabilities on every continent, is proud to announce its role as main sponsor of the PPXXII Conference and Exhibition. This partnership highlights Hultec's commitment to addressing global water scarcity and advancing clean drinking water solutions.

The PPXXII Conference and Exhibition will be hosted at the Hilton Warsaw Hotel, Poland, from September 15-17, 2025.

Zoran Davidovski, Chair of the PPXXII Organizing Committee comments: "Our conference in Warsaw welcomes Hultec's participation within the line-up of sponsors. The European market for modern, efficient and durable plastic pipe systems is forecast to grow by USD 5 billion over the next four years. Our conference in Warsaw will be closely watched."

"Plastic pipes were introduced in Poland during the 1960's. Today, the Polish plastic pipe industry is a sophisticated model of technical innovation and export success (Exports in 2022: USD 3.6B). Major drivers for this growth stem from the construction and infrastructure sectors in Eastern Europe where new and replacement water management and sewer systems continue to stoke demand."

Calling for Abstracts

Event organizers expect that PPXXII will embrace many breakthroughs and developments within the industry. They recently put out a call for all potential presenters to submit a 300 word abstract before **8 November 2024**.

Conference Technical Program Chair/ OC Co-Chair, Sarah Patterson explains: "Up to 100 top flight papers will be delivered during the Warsaw program - with a focus on key technical subjects highlighting sustainable advances and practices, identify market trends for further growth, pipeline solutions, applications and industry insights."

"Typically, our delegates closely review the very latest solutions in the different application areas, materials, additives/ingredients, testing, performance and assessment. Plastic pipe installations are noted for their versatility which is why we are particularly interested in those case studies that reflect ingenuity of design and implementation."

A full list of topics alongside online registration, submission of abstracts, reservation of exhibition space and sponsorship opportunities for PPXXII are posted via:
