

**JOERG WERMELINGER**

Joerg studied mechanical and plastic engineering and graduated in 1984. After joining Georg Fischer Piping Systems, Schaffhausen, Switzerland he was in charge of the development of the Infrared technology for joining plastic pressure piping components. He worked in different managing positions in R&D developing new products and tools for the complete variety of plastic piping application, always with the focus on jointing technologies.

Joerg is member of DVS AG W4 working group for jointing of plastics as well of ISO TC138 SC5 WG17 for alternative test methods.

Currently he is scouting new technologies for the Technology Center of Georg Fischer Piping Systems. Therefor he is running a feasibility study on Non Destructive Test Methods for plastic pipe joints.
