

DOLORES HERRAN GIL

Born in Madrid (Spain).

Mechanical Engineer at the Universidad Politécnica de Madrid - UPM (Spain), specialized in mechanics and heat transfer, and Business Engineer by the Universidad Europea de Madrid – UEM (Spain). Executive MBA graduate of IE Business School.

Dolores started her career working at UPM joining a program for Innovating teaching applied to Heat Transfer at Industrial Mechanic Department of EUITI, researching for teaching practice and exercises applying heat transfer and heat interchanger calibration.

Then joined a leading company specialized in designing and executing installations (water, gas, fire protection), as Project Manager. Reviewing and solving problems on construction projects, both structure and installations. Calculations and field work. Budgets and Geotechnical Reports.

June 2007, she joined Molecor to work in the launching of a new technology that was under development, developing her activity in the international area, implementing Molecor technology worldwide, and developing new markets as Sales Manager. Also involved in the standardization, certification of the product manufactured with Molecor Technology, marketing, and after sales service.

Since April 2016 she develops her activity as Business Development Director looking for new opportunities for MOLECOR technology, pipes, and fittings worldwide.
