

GEORGE DILYANNIS

George is Safripol's senior application specialist for PE100 HDPE materials and has 15 years' experience in the design and development of polyethylene materials. He plays a leading role in product development, type testing and process verification testing as well as application development for pressure and non-pressure pipes for the conveying of potable water and effluent.

George is an active member of SAPPMA (Southern African Plastics Pipe Manufacturers Association) and has leads several workgroups within the SAPPMA technical committee which are focussed on improved product quality and life expectancy for pressure pipes for potable water and natural gas applications.

George has prior experience, as a Maintenance Engineer at AECI, in the area of pressure piping for utilities, including potable water distribution, fire mains and compressed air mains and holds a National Higher Diploma (T4) in Mechanical Engineering, awarded by University of Johannesburg.
